

Short introduction of KÖVET Association

KÖVET Association is an NGO from Budapest, Hungary, working towards environment protection and sustainable development since 1995. KÖVET works with corporates and organises trainings, workshops, company visits, conferences and other professional events on a regular basis, besides its company projects on carbon footprint calculation, Sustainability Report verification, Green Office and Green Event Certification and more.

At the moment KÖVET participates in 2 LIFE projects, LIFE CLIMCOOP and LIFEproETV, the former concentrating on partnerships of cities and industrial areas to work jointly towards reducing the effects of climate change; the latter in an international consortium focuses on the promotion of ETV as a voluntary scheme in Europe. KÖVET also has experience in other projects like EUKI, Visegrad 4, Horizons 2020 and Erasmus+. KÖVET also publishes a professional periodical titled STEPS - towards sustainability.

With KÖVET's latest application for a LIFE project we targeted SMEs and planned to promote digital solutions for the implementation of EMAS. KÖVET is open for projects in the topic of circular economy, environment protection and sustainable development. You can find more information about KÖVET Association at www.kovet.hu/en .
